

Andy Donovan

QUALIFIED COACH

Why work with me?

Coaching changed my life and my mission is to offer that same experience for my clients. I help you reflect honestly on where you are, what you truly want and what might be getting in the way. Then we build a plan to get you there - step by step.

3 things you should know:

- I 'bootstrapped' my own business to a multi-million pound valuation
- I am a former lawyer and I still sit part-time as a Judge
- I can ride a unicycle – or at least, I could the last time I tried!

About me

In 2014, having worked as a lawyer for over a decade, I set up my own niche consulting and SaaS business. The business grew quickly, culminating in an acquisition by a large publicly traded company, and subsequently by a large private equity group. My experience spans 'office junior' right through to founder and CEO, including leading a small division within large corporate groups. Since selling my business, I've been able to focus on my passion: helping others find and live out their full potential.

My experience

I first began coaching over 10 years ago and since training more formally have worked with business leaders, ambitious mid-level executives and also those at the very start of their careers. Recent projects have included coaching the CEO/founder of an accreditation provider and supporting a senior executive rebuild from an experience that knocked their confidence.

Testimonials

"Andy has been an incredible support and guide on my journey. I feel so lucky to have Andy as my coach."

"Andy is superb. He is absolutely invested in his client's success. Highly recommend."

My approach

My style is very relaxed and supportive. I tend to see the potential in everyone and love nothing more than wrestling with personal goals, fears, blocks and strategies. I'm especially passionate about encouraging clients to bring a touch of audacity and daring to their goals. I tend to find that the things that scare us most often point to what's most worth doing. That doesn't mean we need to make life miserable, however. Low stakes experiments and incremental change can deliver monumental results which are actually sustainable.
